01

Basic Installation

Easily installed using basic carpentry tools. The outer face clips magnetically onto the body and can be removed just as easily for cleaning or airflow adjustment.

02

Refined Wall Finish

Sits perfectly flush with the ceiling surface. The precision depth ring creates a subtle architectural shadow detail, refined, minimal, and nearly invisible once installed.

03

Universal Compatibility

Compatible with all standard air duct systems. Airflow can be adjusted without removing the unit, suitable for residential, commercial and hospitality environments.
